SKILLS

LANGUAGES

Arabic — Native

French — Fluent

English — Professional

EDUCATION

2018-2021
National Engineering Degree
Software Engineering - TEK-UP

2009-2012
Applied Bachelor's Degree
Computer Networks - ISSAT

2009
Baccalaureate
Computer Science - Lycée Al Emtyez

CERTIFICATIONS

HTML/CSS/JavaScript Certification

MPR Alcatel Lucent Certification

PROFILE

Fullstack Engineer with **5+ years of experience** on multi-tenant SaaS IoT platforms. Expert in **Angular 15+**, **RxJS**, and **Spring Boot**. Specialized in IoT architecture, real-time data visualization, and gateway integration.

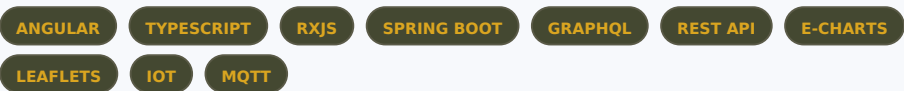

PROFESSIONAL EXPERIENCE

Fullstack JS Developer — IoT Platform

Jul. 2023 - Feb. 2026

Kian Technologies — Retina Platform

- Lead fullstack developer on **Retina** (Angular 15+ / Spring Boot) — multi-tenant IoT SaaS platform managing **10+ industry verticals**.
- Designed a comprehensive **white-labeling system** (themes, logos, colors) for B2B clients — reducing onboarding time by **~40%**.
- Implemented **Angular i18n** for 4 languages (AR/FR/EN/+), covering 100% of CORE modules with zero production regressions.
- Built a reusable **widget library** and configurable dashboards (E-Charts.js, Chart.js) for real-time IoT data visualization.
- Delivered **Anomaly Detection, Billing & Subscription**, and **Gateway Management** modules (MQTT, sensors, Leaflets).
- Architected the **REST API & GraphQL** layer for IoT gateway integration and real-time data synchronization.

Industry-specific modules delivered:

- **Smart Construction** — Site monitoring, equipment & machine tracking.

- **Smart Parking** — Intelligent parking management with real-time occupancy detection.

- **Fleet Ops** — Fleet optimization and real-time vehicle tracking.

- **Aircraft Solution** — IoT solutions for aircraft maintenance tracking.

- **Waste Management** — Smart waste collection optimization.

Frontend Developer Angular / ADF

Feb. 2021 - Jun. 2023

ADDINN Tunisia

- Integrated and maintained Angular interfaces on **Alfresco ADF** for banking and insurance clients — **6 projects delivered** in 2+ years.
- Digi Recouvrement / GED** — Banking debt recovery application covering 3 phases (amicable, transitional, judicial) ; Angular + Spring Boot.
- Smart Claim** — End-to-end claim workflow from declaration to compensation for insurance management.
- FTUSA** — Insurance subscription platform covering risk management, damage assessment and financial settlement.
- POC Complaint Management** — Prototype for banking complaint resolution with multi-stage workflow.
- Agile Scrum collaboration with designers, PO, and Scrum Master (bi-weekly sprints).

- **Digi Recouvrement / GED** — Banking debt recovery management.

- **Smart Claim** — Insurance claim management workflows.
